Authority

11.4 Duties and responsibilities cannot be successfully executed without proper authority. Influence of expertise on delegations

11.7 A function or task may only be delegated to a qualified and competent official. Accountability cannot be established if it is known that the person to be delegated to is not competent or qualified to execute the task.

3	14	6
4	12	5
5	8	4
6	6	3
7	4	2
8	2	1
Non-compliant contributor	0	0

24.1.1.2 Both the user department and the SCM unit have a responsibility towards managing a contract.

24.1.1.3 The nature of the responsibility will determine who manages the specific contractual aspect.

24.1.2 Contract monitoring

24.1.2.1 The Accounting Officer shall monitor on a monthly basis the performance of the contractor under the contract or agreement.

24.1.2.2 The Accounting officer shall regularly report to the Council on the management of the contract or agreement and the performance of the contractor.

24.1.2.3 Constant monitoring is essential to ensure that contractual obligations are met and that contracts run with as little disruption as possible.

24.1.2.4 The SCM Unit is responsible for notifying the user department timely of term contract expiry that will allow the user department sufficient time to decide whether to renew the contract.

24.1.2.5 The user department must ensure that the contractor performs according to the stipulations of the contract in delivering the goods or services on time, in the correct quantity and to the required standard.

24.1.2.6 Regular meetings with contractors to discuss progress, deliverables, foreseeable problems and/or amendments must be held during the contract period.

24.1.3 Trademark/Brand Name

24.1.3.1 If a bid is accepted for a particular trademark/brand name, that trademark/brand name must appear on the product and substitute products must not be accepted.

24.1.4 Non-Contractual Purchases

24.1.4.1 Small quantities of supplies or minor services may be procured outside of the contract in the following circumstances:

24.1.4.1.1 In cases of emergency; or

24.1.4.1.2 When the contractor's point of supply is not situated at or near the place where the supply or service is required; or

24.1.4.1.3 If the contractor's supplies or services are not readily available.

24.1.4.2 Purchases outside the contract must be restricted to requirements that are absolutely necessary to satisfy the immediate requirement and the action must always be justifiable against the contract conditions.

24.1.4.3 Acquisition procedures must in all instances be followed when procuring outside of existing contracts.

24.1.5 Over-/Under Deliveries

Over- and under-deliveries may be accepted in accordance with the Accounting Officer's delegated powers.

24.1.6 Unsatisfactory Performance

The Accounting Officer shall continuously communicate unsatisfactory performance to contractors in writing compelling the contractor to perform according to the contract and thus to rectify or to restrain from unacceptable actions.

24.1.7 Late Deliveries

24.1.7.1 The GCC states that delivery of supplies shall be made in accordance with the conditions specified in the contract.

- 24.1.7.2** Before action due to late delivery is instituted against a contractor who has offered a firm delivery period, the circumstances under which the late delivery took place must be investigated. There may be valid reasons for the late delivery, which are beyond the control of the contractor, in which case action cannot be taken summarily against the contractor.
- 24.1.7.3** On the other hand, contractors must be allowed to delay deliveries repeatedly even where non-firm delivery periods have been offered. Wherever possible, firm delivery periods must be insisted upon before a bid is accepted, as well as when the issue of late deliveries crops up during the period of a contract.

SECTION 25: DISPOSAL MANAGEMENT

25.1 SYSTEM OF DISPOSAL MANAGEMENT

- 25.1.1** The disposal management procedure manual shall provide for an effective system for the disposal or letting of assets no longer needed, including unserviceable, redundant or obsolete assets, subject to section 14 of the Act.
- 25.1.2** Disposal is managed by the following two (2) sub-processes:
- 25.1.2.1** Disposal planning.
 - 25.1.2.2** Determining methods of disposal.

25.2 DISPOSAL PLANNING

25.2.1 Obsolescence Planning

- 25.2.1.1** Action to eliminate the obsolete item need only be taken when the stock level threatens the availability of the equipment.
- 25.2.1.2** For the period leading up to upgrades, in-service equipment will be managed to only maintain current capability and availability.
- 25.2.1.3** Anticipating and solving obsolescence problems is considerably cheaper than waiting until later when major equipment redesign is called for and equipment availability is threatened. Requiring higher shorter-term costs, a policy of spend to save needs therefore to be adopted.

NGWATHE LOCAL MUNICIPALITY

Supply Chain Management Policy

- 25.2.1.4 A proactive approach to the identification of potential obsolescence risks is necessary. Once identified, each obsolescence risk needs to be assessed to determine its criticality.
- 25.2.1.5 What is crucial to the assessment of obsolescence risk is not the time at which a unit or component goes obsolete, but when as a result of the obsolescence, equipment availability will be threatened, the factors are:
 - 25.2.1.6 Criticality point
 - 25.2.1.6.1 This is the point in time at which availability of the equipment is threatened by lack of parts and/or spares.
 - 25.2.1.7 Cost impact
 - 25.2.1.7.1 This is determined by the expected costs that would be incurred to solve the problem if no action is taken until the time of occurrence of the obsolescence.
 - 25.2.1.8 Prioritisation
 - 25.2.1.8.1 Prioritise all current obsolescence risk by order of the point of criticality and in order of cost. The most critical will then need to be considered further for resolution of the specific problems.
 - 25.2.1.9 For each obsolescence risk, it needs to be decided what technology option is to be adopted, the support which is to be provided, the contracting arrangements needed, the maintenance policy which is implied and the identification of any consequential risks.
 - 25.2.1.10 Whatever techniques are chosen for managing obsolescence, solid configuration management and well-disciplined change control procedures must be employed in order to ensure that a correct picture is available of the current equipment situation and of all the configuration options which are available for implementation.

25.3 RENEWAL PLANNING

- 25.3.1 The asset renewal-planning phase involves the assessment of existing assets and planned acquisitions against IDP requirements.
- 25.3.2 Proposals for new assets must be justified by a thorough evaluation of all IDP options.
- 25.3.3 The municipality should develop IDP strategies which:

NGWATHE LOCAL MUNICIPALITY

Supply Chain Management Policy

- 25.3.3.1 Define the scope, standard and level of programme services to be delivered.
- 25.3.3.2 Assess the methods of delivering these services.
- 25.3.3.3 Determine, where appropriate, methods of containing the demand for the services.
- 25.3.3.4 Identify the resources including assets, required to deliver the services. Service options need to be evaluated on financial, economic, social and environmental grounds.
- 25.3.4 The evaluation of existing assets determines whether their performance is adequate to support the selected service delivery strategy. This process presupposes that appropriate condition and performance standards are set for assets. Asset performance is to be reviewed regularly against best practice benchmarks to identify assets that are under-performing, or costly to own or operate.
- 25.3.5 The evaluation should reveal assets that provide more than their required capacity, or are surplus to requirements. Assets that have been inadequately maintained may pose potential safety or health risks, disrupt essential services, or incur unforeseen expenditure for the correction of defects. Replacement may be a possible option in this case.
- 25.3.6 All assets currently being used to deliver the service under consideration need to be identified and registered. How effectively these assets support service requirements also have to be determined. As part of this process, assets should be evaluated in terms of their:
 - 25.3.6.1 Physical condition
 - 25.3.6.1.1 Is the asset adequately maintained?
 - 25.3.6.1.2 Are major replacements or refurbishments likely to be required during the planning period?
 - 25.3.6.2 Functionality
 - 25.3.6.2.1 How well suited is the asset to the activities and functions it supports?
 - 25.3.6.3 Utilisation
 - 25.3.6.3.1 How intensively is the asset used?
 - 25.3.6.3.2 Could it be used more productively or accommodating additional functions?
 - 25.3.6.4 Financial performance

25.3.6.4.1 Are the assets' operating costs similar to those for other comparable assets?

25.3.7 The assessment of existing assets must include those assets in the process of being acquired or that are committed. The result of evaluating existing and anticipated new assets is a list of assets available or expected to be available.

25.3.8 The planning process should match the prospective demand for assets with the current asset supply to develop the renewal strategy.

25.4 UNSERVICEABLE/OBSOLETE/REDUNDANT ITEMS

25.4.1 During stock take, the stocktaking team must ensure that the following actions are taken:

25.4.1.1 Check the quantity and condition of inventory items to establish whether it is considered to be in a reasonable state of serviceability.

25.4.1.2 Check for items that have been issued and are not being used.

25.4.1.3 Check whether issued items are being used for the purpose intended.

25.4.1.4 Check for unserviceable, repairable, obsolete or redundant items.

25.4.2 After completion of the stock take, a stocktaking report must be compiled and submitted to the supply chain manager. This will form the basis of the following lists:

25.4.2.1 Unserviceable items.

25.4.2.2 Obsolete items.

25.4.2.3 Redundant items.

25.5 DISPOSAL STRATEGY

25.5.1 Effective asset disposal frameworks incorporate consideration of alternatives for the disposal of surplus, obsolete, under-performing or unserviceable assets. Alternatives should be evaluated in cost-benefit terms.

25.5.2 A disposal strategy establishes the rationale for the anticipated time and method of and the expected proceeds on disposal. The strategy is reviewed and refined, if necessary, prior to disposal, to take account of the market and physical condition of the assets.

25.5.3 Under-utilised and under-performing assets are identified as part of a regular, systematic review process.

- 25.5.4 The reasons for under-utilisation or poor performance are critically examined and corrective action taken to remedy the situation or a disposal decision is made.
- 25.5.5 Analysis of disposal methods has regard to potential market values or other intrinsic values such as the location and volume of assets to be disposed of, the ability to support other programmes, environmental implications and regular evaluation of disposal performance.
- 25.5.6 Effective management of the disposal process will minimise holdings of surplus and under-performing assets and will maximise the return of such assets.

25.6 THE DISPOSAL DECISION

- 25.6.1 The disposal decision cannot be taken in isolation. Asset disposal decisions are to be made within an integrated, service and financial planning framework. While disposal is viewed as the final stage in asset management it is common for disposal action to trigger the acquisition of a new asset or a replacement asset.
- 25.6.2 The asset register is a starting point for this analysis as it records the useful lives of assets and is able to provide an indication of the timing of major replacements in the normal course of business.
- 25.6.3 Other important documents necessary to take a disposal decision are:
 - 25.6.3.1 The obsolescence plan.
 - 25.6.3.2 The renewal plan.
 - 25.6.3.3 The list of unserviceable items.
 - 25.6.3.4 The list of obsolete items.
 - 25.6.3.5 The list of redundant items.
- 25.6.4 The following policy guidelines are provided to help the municipality to dispose of their assets in an accountable manner. The municipality should:
 - 25.6.4.1 Establish and maintain an asset information system, which records all relevant information on assets in disposal management.
 - 25.6.4.2 Prepare and evaluate proper costing to support the selection of the most cost-effective disposal method.
 - 25.6.4.3 Identify those areas most susceptible to fraud or risks and introduce appropriate preventive measures.

- 25.6.4.4 Identify and communicate the preferred arrangements for disposals to relevant staff.
- 25.6.4.5 Engage experts to develop the terms of contract and to assist in preparing the contract to minimise the exposure to risk.
- 25.6.4.6 Provide clear instructions to the official engaged to undertake the disposal.
- 25.6.4.7 Monitor and evaluate disposal performance regularly for achievement, fair dealing, cost-effective choice of disposal methods and for compliance with the municipality's disposal policies and objectives.

25.7 ALTERNATIVES TO DISPOSAL

- 25.7.1 Where assets have been identified as under-performing or no longer functionally suited to programme delivery needs, thought should be given to the following possible alternatives to disposal:
 - 25.7.1.1 A factor to consider is whether utilisation can be increased by adapting the asset to another function or using it in another programme.
 - 25.7.1.2 Refurbishment or an upgrade of the asset may also be viable. The cost and benefit of such alternatives should be included in the disposal strategy.

25.8 DETERMINING METHODS OF DISPOSAL

- 25.8.1 The primary methods of disposal include sale by public auction or bidding, sale by private treaty, trade-in, write-off and letting.
- 25.8.2 Whatever method is chosen, it is important, not least for accountability and transparency, that a properly costed evaluation of relevant disposal option is prepared. This should take into account both the costs associated with each method of disposal and the likely benefits (including possible proceeds).
- 25.8.3 Before deciding on a particular disposal method, the following matters should be considered:
 - 25.8.3.1 The nature of the asset.
 - 25.8.3.2 Its potential market value.
 - 25.8.3.3 Other intrinsic value of the asset.
 - 25.8.3.4 Its location.

NGWATHE LOCAL MUNICIPALITY

Supply Chain Management Policy

- 25.8.3.5 Its volume.
- 25.8.3.6 Its trade-in value.
- 25.8.3.7 Its ability to support other programmes.
- 25.8.3.8 Environmental considerations.
- 25.8.3.9 Market conditions.
- 25.8.3.10 The asset's lifetime.
- 25.8.3.11 Professional valuations play an important role in asset disposal. It can help managers to select the most appropriate selling method. It also helps to set realistic expectations for the sale. If it is required, valuations must be obtained from experienced agents who have knowledge of the type of asset(s) for sale and current market trends.

25.9 DISPOSAL OF CAPITAL ASSETS

- 25.9.1 The municipality may not transfer ownership as a result of a sale or other transaction or otherwise permanent dispose of a capital asset needed to provide the minimum level of basic municipal services.
- 25.9.2 The municipality may transfer ownership or otherwise disposal of a capital asset other than one mentioned above, only after the Municipal Council, in a meeting open to the public:
 - 25.9.2.1 Has decided on reasonable grounds that the asset is not needed to provide the minimum level of basic municipal services.
 - 25.9.2.2 Has considered the fair market value of the asset and the economic and community value to be received in exchange for the asset.
- 25.9.3 A decision by the Municipal Council that a specific capital asset is not needed to provide the minimum level of basic municipal services, may not be reversed by the municipality after that asset has been sold, transferred or otherwise disposed of.
- 25.9.4 Any transfer of ownership of a capital asset in terms of par 3.4.2 must be fair, equitable, transparent, competitive and consistent with the supply chain management policy of the municipality.

NGWATHE LOCAL MUNICIPALITY

Supply Chain Management Policy

25.10 DISPOSAL OF IMMOVABLE PROPERTY

25.10.1 Immovable property may be sold only at market related prices except when the public interest or the plight of the poor demands otherwise.

25.10.2 Immovable property is let at market related rates except when the public interest or the plight of the poor demands otherwise.

25.10.3 All fees, charges, rates, tariffs, scales of fees or other charges relating to the letting of immovable property are annually reviewed.

25.11 DISPOSAL OF FIREARMS

In the case of the disposal of firearms, the National Conventional Arms Control Committee has to approve any sale or donation of firearms to any person or institution within or outside the Republic.

25.12 DISPOSAL OF MOVABLE ASSETS

25.12.1 Transferring the asset to another organ of state in terms of a provision of the Act enabling the transfer of assets.

25.12.2 Transferring the asset to another organ of state at market related value or when appropriate, free of charge.

25.12.3 Movable assets may be sold to either by way of written price quotations, competitive bids and auction or at market related prices, whichever is the most advantageous to the municipality. Bid documents must comply with the criteria prescribed in terms of the PPPFA (Act No 5 of 2000).

25.12.4 Ensure that all immovable property is let at market related rates.

25.12.5 In cases where assets are traded in for other assets, the highest possible trade-in price is to be negotiated.

25.13 COMPUTER EQUIPMENT

In the case of the free disposal of computer equipment, the provincial department of education must first be approached to indicate within 30 days whether any of the local schools are interested in the equipment.

25.14 OTHER DISPOSAL MECHANISMS

25.14.1 Other appropriate ways of disposal may include:

25.14.1.1 Donations.

25.14.1.2 Auctioning the asset

25.14.1.3 Sale to staff.

25.14.1.4 Sell as scrap.

25.14.1.5 Recycling.

25.14.1.6 Cannibalisation.

25.14.1.7 Destroying such assets.

25.15 DISPOSAL REGISTER

25.15.1 All the steps in the disposal process must be recorded in the disposal register. The disposal manager keeps this register. Such a register must address the following aspects:

25.15.1.1 Date on which disposal was requested.

25.15.1.2 Sequence serial number of convening.

25.15.1.3 Date of physical inspection by the Disposal Committee.

25.15.1.4 Date that the disposal certificate was submitted to the Accounting Officer.

25.15.1.5 The date on which confirmation was given by the Accounting Officer.

25.15.1.6 Actual date of physical disposal of item in terms of confirmation instruction received.

25.15.1.7 Date confirming that disposal instructions were adhered to.

25.16 GENERAL ISSUES

25.16.1 At the very least, a comparison of the actual timing and proceed on disposal should be made with the standard established for the class in the municipality's accounting policies. This is a means of confirming that the useful life, estimated proceeds, and therefore the depreciation rates used are valid. It also provides the opportunity to identify causes where assets are routinely not meeting the service life expectations or their estimated proceeds on disposal.

25.16.2 In addition to undertaking the cost-benefit analysis of the methods of disposal, the Asset Manager is required to compare actual life at disposal with the expected useful life and to explain significant variations.

27.1 INTERNAL MONITORING

The supply chain performance management shall provide for an effective internal monitoring system in order to determine, on the basis of a retrospective analysis, whether the authorised supply chain management processes are being followed and whether the desired objectives are being achieved.

27.2 ISSUES TO BE REVIEWED

- 27.2.2 Compliance with norms and standards.
- 27.2.3 Savings generated.
- 27.2.4 Stores efficiency.
- 27.2.5 Cost variance per item.
- 27.2.6 Contract breach, etc.
- 27.2.7 Cost efficiency of procurement process (i.e. the cost of the process itself).
- 27.2.8 Whether supply chain objectives are consistent with Government's broader policy focus.
- 27.2.9 That the material construction standards become increasingly aligned with those standards that support international best practice.
- 27.2.10 That the principles of cooperative governance as expounded in the constitution are observed.
- 27.2.11 That the reduction of regional economic disparities is promoted.
- 27.2.12 At completion stage of each project, an assessment of the supplier/service provider (including consultants where applicable) be undertaken and that this assessment should be available for future reference. Accounting Officers should take cognisance of the fact that when suppliers do not perform according to their contractual obligations and the Accounting Officer does not address his/her in this regard during the execution of the contract, such non-performance cannot be deemed as sound reason for passing over the bid of such supplier when adjudicating future bids.

27.3 DIMENSIONS OF PERFORMANCE

27.3.1 EQUITY

Measures of equity would monitor the extent to which the municipality has achieved and been able to maintain an equitable supply of comparable services across race groups, regions, and urban and rural areas. It would require the municipality to undertake a benefit incidence analysis aimed at answering, “Who benefits from the services being delivered? And where are the funds being spent and the services delivered?”

27.3.2 EFFICIENCY

Measures of efficiency seek to reflect how productively resources are translated into service delivery. It is therefore measured by a ratio of output to input. The higher the numerical value of this ratio, the greater the efficiency.

27.3.3 ECONOMY

Measures of economy look at the cost of inputs, and mode of production to evaluate whether it is cost-effective, i.e. the aim is to answer the question “Was this the cheapest way of producing the desired outputs?” These measures also only have meaning in a relative sense, which means the municipality needs to either compare the actual cost of their outputs with budgeted costs, and explain variances or compare the cost of their outputs with the cost of similar outputs produced elsewhere, e.g. to other state institutions, provinces, in the private sector or in other countries.

27.3.4 EFFECTIVENESS

Indicators of effectiveness seek to reflect how well the outputs contribute to the achievement of the desired outcomes/objective/goals. Measuring effectiveness assumes a model of how outputs relate to the achievement of the desired outcomes.

27.3.5 VALUE FOR MONEY

- 27.3.5.1 Indicators of value for money explore people's perceptions on whether resources have been well used to impact upon specific outcomes. While indicators of value for money are subjective in nature, the methodology used to collect the information on people's perceptions is usually objective e.g. customer surveys or public opinion surveys.
- 27.3.5.2 Given these different dimensions of performance, the municipality need to develop measurable objectives and related performance measures and targets that capture strategically important aspects of what they are doing or delivering so as to be able to monitor performance.
- 27.3.5.3 All performance measures and targets need to comply with the "carrot" criteria, i.e. they need to be:

Comparable	Information in a format that can be compared across time, region or institution.
Accessible	Clear, easily understood.
Relevant	Measures something meaningful from a management and oversight perspective.
Reliable	Free from error, unbiased, complete and can be replicated.
Operational	Relatively easy to collect data.
Timely	Must be readily available so it can be used for management and oversight.

27.4 MONITORING OF MUNICIPAL SUPPLY CHAIN MANAGEMENT

- 27.4.1 The AO of the municipality must within 30 days of the end of the financial year, submit a report on the implementation of the SCM policy of the municipality, to the Council of the municipality.
- 27.4.2 Whenever there are serious and material problems in the implementation of the SCM policy, the Accounting Officer must immediately submit a report to the Council of the municipality.
