## Accounting Officer's Responsibilities and Approval

---

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June 2021 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The annual financial statements set out on pages 5 to 91, which have been prepared on the going concern basis, were approved by the accounting officer on 30 October 2020 and were signed on its behalf by:

---

**Accounting Officer**  
**Mr. Kannemeyer BW**

Annual Financial Statements for the year ended 30 June 2020

## Accounting Officer's Report

---

The accounting officer submits his report for the year ended 30 June 2020.

### 1. Review of activities

#### Main business and operations

The municipality is engaged in providing municipal services, infrastructure development and furthering the interest of the local community in the Ngwathe area, Free State Province and operates principally in South Africa.

The operating results and state of affairs of the municipality are fully set out in the attached annual financial statements and do not in our opinion require any further comment.

### 2. Going concern

We draw attention to the fact that at 30 June 2020, the municipality had an accumulated surplus (deficit) of R (147,238,468) and that the municipality's total liabilities exceed its assets by R (147,238,468).

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

### 3. Subsequent events

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

### 4. Accounting Officer

The accounting officer of the municipality during the year and to the date of this report is as follows:

Name

Kannemeyer BW

# Ngwathe Local Municipality

## Accounting Policies

---

### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003) (MFMA).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand. All figures are rounded to the nearest Rand.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

#### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

#### 1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

##### **Trade receivables / held to maturity investments and/or loans and receivables**

The municipality assesses its trade receivables, held to maturity investments and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables, held to maturity investments and loans and receivables is calculated on a portfolio basis. For amounts due to the municipality, significant financial difficulties of the receivable, probability that the receivable will enter bankruptcy and default of payments are all considered indicators of impairment.

##### **Allowance for slow moving, damaged and obsolete inventory**

An allowance for stock to write stock down to the lower of cost or net realisable value. Management has made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the operation surplus note.

##### **Fair value estimation**

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

The municipality used the prime interest rate at year end to discount future cash flows.

## Accounting Policies

---

### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the key assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of goodwill and tangible assets.

#### Value in use of cash generating assets

The municipality reviews and tests the carrying value of cash generating assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors, together with economic factors such as exchange rates, inflation and interest rates.

#### Value in use of non-cash generating assets

The municipality reviews and tests the carrying value of non-cash generating assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. If there are indications that impairment may have occurred, the remaining service potential of the asset is determined. The most appropriate approach selected to determine the remaining service potential is dependent on the availability of data and the nature of the impairment.

#### Provisions

Provisions were raised and management determined an estimate based on the information available. An additional disclosure of these estimates of provisions are included in note 16 - Provisions.

#### Useful lives of property, plant and equipment and other assets

The municipality's management determines the estimated useful lives and related depreciation charges for the property, plant and equipment and other assets. This estimate is based on industry norms and on the pattern in which an asset's future economic benefit or service potential is expected to be consumed by the municipality.

Management will increase the depreciation charge where useful lives are less than previously estimated useful lives and decrease depreciation charge where useful lives are more than previously estimated useful lives.

#### Post-retirement benefits and other long-term benefits

The present value of the post retirement and long-term benefit obligations depend on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement and long-term benefit obligations.

The municipality determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the post retirement and long-term benefit obligations. In determining the appropriate discount rate, the municipality considers the market yields at the reporting date on government bonds that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension or other long-term liability. Where there is no market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, the municipality uses current market rates of the appropriate term to discount shorter term payments and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve.

Other key assumptions for post-retirement and other long-term obligations are based on current market conditions. Additional information is disclosed in Note 17.

#### Effective interest rate

The municipality uses the prime interest rate to discount future cash flows.

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### Allowance for impairment of financial assets

On receivables an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the receivables carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

### 1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation Or both, rather than for:

- Use in the production or supply of goods or services or for
- Administrative purposes, or
- Sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or services potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is recognised at cost. Transaction costs are included in the initial measurement. Subsequent to initial measurement.

Investment property is measured at cost.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### Fair value

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

Once the entity becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value.

Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property are the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

The nature OR type of properties classified as held for strategic purposes are as follows:

The municipality separately discloses expenditure to repair and maintain investment property in the notes to the annual financial statements (see note 3).

## Accounting Policies

---

### 1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Property, plant and equipment are initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement part is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the municipality is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

#### Subsequent measurement:

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses. Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment are depreciated over their expected useful lives to their estimated residual value. The depreciation charge for each period is recognised in surplus or deficit.

The useful lives of items of property, plant and equipment have been assessed as follows:

---

Item	Depreciation method	Average useful life
Airport	Straight line	15 to 20 years
Buildings	Straight line	50 years
Furniture and fixtures	Straight line	5 to 10 years
Infrastructure	Straight line	3 to 100 years

---

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.5 Property, plant and equipment (continued)

IT equipment	Straight line	3 to 6 years
Land	Straight line	Indefinite
Motor vehicles	Straight line	3 to 20 years
Office equipment	Straight line	3 to 6 years
Plant and machinery	Straight line	5 to 15 years

The municipality assesses at each reporting date whether there is any indication that the municipality expectations about the residual value and the useful life of an asset have changed since the preceding reporting date. If any such indication exists, the municipality revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate in terms of the Standard of GRAP on Accounting Policies, Changes in Estimates and Errors.

Assets of the property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

The municipality separately discloses expenditure to repair and maintain property, plant and equipment in the notes to the annual financial statements (see note 4).

The municipality discloses relevant information relating to assets under construction or development, in the notes to the financial statements (see note 4).

### 1.6 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from the municipality and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of whether the municipality intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the municipality or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it, as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably.

Intangible assets are initially measured at cost.

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life.

Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.6 Intangible assets (continued)

Internally generated goodwill is not recognised as an intangible asset.

Amortisation is provided to write down the intangible assets to their residual values. The amortisation charge for each period is recognised in surplus or deficit.

The useful lives of items of intangible assets have been assessed as follows:

---

<b>Item</b>	<b>Depreciation method</b>	<b>Average useful life</b>
Computer software, other	Straight line	5 years
Servitudes		Indefinite

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from it's use or disposal.

The gain or loss arising from the derecognition of an intangible assets are included in surplus or deficit when the asset is derecognised (unless the Standard of GRAP on leases requires otherwise on a sale and leaseback).

## Accounting Policies

---

### 1.7 Impairment of cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets used with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

#### Identification

The municipality assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

#### Value in use

When estimating the value in use of an asset, the municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the municipality applies the appropriate discount rate to those future cash flows.

#### Discount rate

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

#### Recognition and measurement (individual asset)

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Cash-generating units

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the municipality uses management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.7 Impairment of cash-generating assets (continued)

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the municipality does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

### Reversal of impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

### Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

### 1.8 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.8 Impairment of non-cash-generating assets (continued)

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

### Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

### Reversal of an impairment loss

The municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

### 1.8 Impairment of non-cash-generating assets (continued)

#### Redesignation

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

### 1.9 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses.

The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loan commitment is a firm commitment to provide credit under pre-specified terms and conditions.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risks: currency risk, interest rate risk and other price risk.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

## Accounting Policies

---

### 1.9 Financial instruments (continued)

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives;
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
  - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

#### Classification

The entity has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

<b>Class</b>	<b>Category</b>
Other financial assets	Financial asset measured at fair value
Receivables from exchange transactions	Financial asset measured at amortised cost
Receivables from non-exchange transactions	Financial asset measured at amortised cost
Cash and cash equivalents	Financial asset measured at amortised cost
Other receivables	Financial asset measured at amortised cost

The entity has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

<b>Class</b>	<b>Category</b>
Payables from exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost
Unspent conditional grants and receipts	Financial liability measured at amortised cost

#### Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

The entity recognises financial assets using trade date accounting.

#### Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.9 Financial instruments (continued)

#### Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

#### Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the entity establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, referenced to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the municipality uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants will consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, the municipality calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

Short-term receivables and payables are not discounted when the initial credit period granted or received is consistent with terms used in the public sector, either through established practices or legislation.

#### Reclassification

The entity does not reclassify a financial instrument while it is issued or held unless it is:

- combined instruments that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

Where the entity cannot reliably measure the fair value of an embedded derivative that has been separated from a host contract that is a financial instrument at a subsequent reporting date, it measures the combined instrument at fair value. This requires a reclassification of the instrument from amortised cost or cost to fair value.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the entity reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

#### Gains and losses

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

#### Impairment and uncollectibility of financial assets

The entity assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

#### Financial assets measured at amortised cost:

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.9 Financial instruments (continued)

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in the carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

#### **Financial assets measured at cost :**

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.9 Financial instruments (continued)

#### Derecognition

##### Financial assets

The entity derecognises financial assets using trade date accounting.

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity :
  - derecognises the asset; and
  - recognises separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the entity transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognises either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognises the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the entity has retained substantially all the risks and rewards of ownership of the transferred asset, the entity continues to recognise the transferred asset in its entirety and recognises a financial liability for the consideration received. In subsequent periods, the entity recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

##### Financial liabilities

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.9 Financial instruments (continued)

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

#### Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Distributions to holders of residual interests are recognised by the entity directly in net assets. Transaction costs incurred on residual interests are accounted for as a deduction from net assets. Income tax [where applicable] relating to distributions to holders of residual interests and to transaction costs incurred on residual interests are accounted for in accordance with the International Accounting Standard on Income Taxes.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

### 1.10 Statutory receivables

#### Identification

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

#### Recognition

The municipality recognises statutory receivables as follows:

- if the transaction is an exchange transaction, using the policy on Revenue from exchange transactions;
- if the transaction is a non-exchange transaction, using the policy on Revenue from non-exchange transactions (Taxes and transfers); or
- if the transaction is not within the scope of the policies listed in the above or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the municipality and the transaction amount can be measured reliably.

#### Initial measurement

The municipality initially measures statutory receivables at their transaction amount.

#### Subsequent measurement

The municipality measures statutory receivables after initial recognition using the cost method. Under the cost method, the initial measurement of the receivable is changed subsequent to initial recognition to reflect any:

- interest or other charges that may have accrued on the receivable (where applicable);
- impairment losses; and
- amounts derecognised.

#### Accrued interest

---

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.10 Statutory receivables (continued)

Where the municipality levies interest on the outstanding balance of statutory receivables, it adjusts the transaction amount after initial recognition to reflect any accrued interest. Accrued interest is calculated using the nominal interest rate.

Interest on statutory receivables is recognised as revenue in accordance with the policy on Revenue from exchange transactions or the policy on Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

#### Other charges

Where the municipality is required or entitled in terms of legislation, supporting regulations, by-laws or similar means to levy additional charges on overdue or unpaid amounts, and such charges are levied, these charges are accounted for in terms of the municipality's accounting policy on Revenue from exchange transactions or Revenue from non-exchange transactions (Taxes and transfers), whichever is applicable.

#### Impairment losses

The municipality assesses at each reporting date whether there is any indication that a statutory receivable or a group of statutory receivables, may be impaired.

In assessing whether there is any indication that a statutory receivable, or group of statutory receivables, may be impaired, the municipality considers, as a minimum, the following indicators:

- significant financial difficulty of the receivable, which may be evidenced by an application for debt counselling, business rescue or an equivalent;
- it is probable that the receivable will enter sequestration, liquidation or other financial re-organisation;
- a breach of the terms of the transaction, such as default or delinquency in principal or interest payments (where levied); and
- adverse changes in international, national or local economic conditions, such as a decline in growth, an increase in debt levels and unemployment, or changes in migration rates and patterns.

If there is an indication that a statutory receivable, or a group of statutory receivables, may be impaired, the municipality measures the impairment loss as the difference between the estimated future cash flows and the carrying amount. Where the carrying amount is higher than the estimated future cash flows, the carrying amount of the statutory receivable, or group of statutory receivables, is reduced, through the use of an allowance account. The amount of the losses are recognised in surplus or deficit.

An impairment loss recognised in prior periods for a statutory receivable is revised if there has been a change in the estimates used since the last impairment loss was recognised, or to reflect the effect of discounting the estimated cash flows.

Any previously recognised impairment loss is adjusted by adjusting the allowance account. The adjustment does not result in the carrying amount of the statutory receivable or group of statutory receivables exceeding what the carrying amount of the receivable(s) would have been had the impairment loss not been recognised at the date the impairment is revised. The amount of any adjustment is recognised in surplus or deficit.

#### Derecognition

The municipality derecognises a statutory receivable, or a part thereof, when:

- the rights to the cash flows from the receivable are settled, expire or are waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the receivable; or
- the municipality, despite having retained some significant risks and rewards of ownership of the receivable, has transferred control of the receivable to another party and the other party has the practical ability to sell the receivable in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
  - derecognises the receivable; and
  - recognises separately any rights and obligations created or retained in the transfer.

The carrying amounts of any statutory receivables transferred are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. The municipality considers whether any newly created rights and obligations are within the scope of the Standard of GRAP on Financial Instruments or another Standard of GRAP. Any difference between the consideration received and the amounts derecognised and, those amounts recognised, are recognised in surplus or deficit in the period of the transfer.

### 1.11 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) method. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered.

The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

### 1.12 Share capital / contributed capital

An equity instrument is any contract that evidences a residual interest in the assets of an municipality after deducting all of its liabilities.

### 1.13 Value Added Tax (VAT)

The municipality accounts for VAT on cash basis. The municipality is liable to account for VAT at a standard rate of 15% effective from 1 April 2018 in terms of section 7(1)(a) of the VAT Act in respect of supply of goods and services, except where the supplies are specifically zero rated in terms of section 11, exempted in terms of section 12 of the VAT Act or are scoped out for VAT purposes. The municipality account for VAT on a monthly basis.

### 1.14 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for services rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

### Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cell phones) for current employees.

When an employee has rendered service to the municipality during a reporting period, the municipality recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognises that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measures the expected cost of accumulating compensated absences as the additional amount that the municipality expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The municipality recognises the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the municipality has no realistic alternative but to make the payments.

---

### 1.14 Employee benefits (continued)

The entity recognises the expected cost of bonus, incentive and performance related payments, when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

#### Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

#### Other long-term employee benefits

The municipality has an obligation to provide long service benefits to all of its employees. According to the rules of the long service benefit scheme, which the municipality instituted and operates, an employee (who is on the current conditions of service), is entitled to a cash allowance, calculated in terms of the rules of the scheme, after 10, 15, 20, 25 and 30 years of continued service. The municipality's liability is based on an actuarial valuation. The projected unit credit method has been used to value the liabilities. Actuarial gains and losses on the long benefits are accounted for through the statement of financial performance.

---

### 1.15 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating surplus (deficit).

#### **A contingent liability is:**

- a possible obligation that arises from past events, and whose existence will be confirmed only by the occurrence and non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- a present obligation that arises from past events but is not recognised because:
  - (i) it is not probable that an outflow of resources embodying economic benefits or services potential will be required to settle the obligation; or
  - (ii) the amount of the obligation cannot be measured with sufficient reliability.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in note .

#### **Decommissioning, restoration and similar liability**

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

### 1.16 Accumulated surplus

The accumulated surplus represents the net difference between the total assets and the total liabilities of the municipality. Any surpluses and deficits realised during a specific financial year are credited / debited against accumulated surplus / deficit. Prior year adjustments, relating to income and expenditure, are credited / debited against accumulated surplus when retrospective adjustments are made.

### 1.17 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.17 Revenue from exchange transactions (continued)

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Service revenue is recognised by reference to the stage of completion of the transaction at the reporting date. Stage of completion is determined by services performed to date as a percentage of total services to be performed.

#### Interest and dividends

Revenue arising from the use by others of municipal assets yielding interest and dividends or similar distributions is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- the amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

Dividends or similar distributions are recognised, in surplus or deficit, when the municipality's right to receive payment has been established.

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

### 1.18 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Control of an asset arises when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.18 Revenue from non-exchange transactions (continued)

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, the municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

#### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

#### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.18 Revenue from non-exchange transactions (continued)

#### Property rates

The municipality recognises an asset in respect of taxes when the taxable event occurs and the asset recognition criteria are met.

Resources arising from taxes satisfy the definition of an asset when the municipality controls the resources as a result of a past event (the taxable event) and expects to receive future economic benefits or service potential from those resources. Resources arising from taxes satisfy the criteria for recognition as an asset when it is probable that the inflow of resources will occur and their fair value can be reliably measured. The degree of probability attached to the inflow of resources is determined on the basis of evidence available at the time of initial recognition, which includes, but is not limited to, disclosure of the taxable event by the taxpayer.

The municipality analyses the taxation laws to determine what the taxable events are for the various taxes levied.

The taxable event for property tax is the passing of the date on which the tax is levied, or the period for which the tax is levied, if the tax is levied on a periodic basis.

Taxation revenue is determined at a gross amount. It is not reduced for expenses paid through the tax system.

#### Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality. The municipality makes use of estimates to determine the amount of revenue that it is entitled to collect. Where settlement discounts or reductions in the amount payable are offered, the municipality considers past history in assessing the likelihood of these discounts or reductions being taken up by receivables.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting municipality.

#### Gifts and donations, including goods in-kind

Gifts and donations, including goods in-kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

#### Services in-kind

Except for financial guarantee contracts, the municipality recognises services in-kind that are significant to its operations and/or service delivery objectives as assets and recognise the related revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

Where services in-kind are not significant to the municipality's operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, the municipality discloses the nature and type of services in-kind received during the reporting period.

### 1.19 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

### 1.20 Borrowing costs

Borrowing costs are interest and other expenses incurred by the municipality in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.21 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.21 Leases (continued)

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### Operating leases - lessor

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in the statement of financial performance.

#### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

### 1.22 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year. Refer to note 41&43.

### 1.23 Commitments

Items are classified as commitments when the municipality has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the municipality – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

### 1.24 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.24 Unauthorised expenditure (continued)

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.25 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.26 Irregular expenditure

Irregular expenditure is defined in section 1 of the MFMA as follows:

“irregular expenditure”, in relation to a municipality or municipal entity, means (a) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of this Act, and which has not been condoned in terms of section 170;

(b) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the Municipal Systems Act, and which has not been condoned in terms of that Act;

(c) expenditure incurred by a municipality in contravention of, or that is not in accordance with, a requirement of the Public Office-Bearers Act, 1998 (Act No. 20 of 1998); or

(d) expenditure incurred by a municipality or municipal entity in contravention of, or that is not in accordance with, a requirement of the supply chain management policy of the municipality or entity or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in terms of such policy or by-law,

but excludes expenditure by a municipality which falls within the definition of “unauthorised expenditure”.

In this context ‘expenditure’ refers to any use of municipal funds that is in contravention of the following legislation:

- (i) Municipal Finance Management Act, Act 56 of 2003, and its regulations;
- (ii) Municipal Systems Act, Act 32 of 2000, and its regulations;
- (iii) Public Office-Bearers Act, Act 20 of 1998, and its regulations; and
- (iv) The municipality's supply chain management policy, and any by-laws giving effect to that policy in the current financial year.

Irregular expenditure that was incurred and identified during the current financial and which was condoned before year end and/or before finalisation of the financial statements must also be recorded appropriately in the irregular expenditure register. In such an instance, no further action is also required with the exception of updating the note to the financial statements.

Irregular expenditure that was incurred and identified during the current financial year and for which condonement is being awaited at year end must be recorded in the irregular expenditure register. No further action is required with the exception of updating the note to the financial statements.

Where irregular expenditure was incurred in the previous financial year and is only condoned in the following financial year, the register and the disclosure note to the financial statements must be updated with the amount condoned.

Irregular expenditure that was incurred and identified during the current financial year and which was not condoned by the National Treasury or the relevant authority must be recorded appropriately in the irregular expenditure register. If liability for the irregular expenditure can be attributed to a person, a debt account must be created if such a person is liable in law. Immediate steps must thereafter be taken to recover the amount from the person concerned. If recovery is not possible, the accounting officer or accounting authority may write off the amount as debt impairment and disclose such in the relevant note to the financial statements. The irregular expenditure register must also be updated accordingly. If the irregular expenditure has not been condoned and no person is liable in law, the expenditure related thereto must remain against the relevant programme/expenditure item, be disclosed as such in the note to the financial statements and updated accordingly in the irregular expenditure register.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.26 Irregular expenditure (continued)

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the municipality's supply chain management policy.

Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### 1.27 Budget information

Municipality is typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by a municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 01/07/2019 to 30/06/2020.

The budget for the economic entity includes all the entities approved budgets under its control.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

### 1.28 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

### 1.29 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The municipality adjusts the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The municipality discloses the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

## **Accounting Policies**

---

### **1.30 Consumer deposits**

Consumer deposits are subsequently recorded in accordance with accounting policy of trade and other payables.

### **1.31 Unspent conditional grant and receipts**

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

### 2. New standards and interpretations

#### 2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

##### **GRAP 34: Separate Financial Statements**

The objective of this Standard is to prescribe the accounting and disclosure requirements for investments in controlled entities, joint ventures and associates when an entity prepares separate financial statements.

It furthermore covers Definitions, Preparation of separate financial statements, Disclosure, Transitional provisions and Effective date.

The effective date of the standard is for years beginning on or after 01 April 2020.

The municipality expects to adopt the standard for the first time in the 2020/2021 annual financial statements.

The impact of this standard is currently being assessed.

##### **GRAP 35: Consolidated Financial Statements**

The objective of this Standard is to establish principles for the presentation and preparation of consolidated financial statements when an entity controls one or more other entities.

To meet this objective, the Standard:

- requires an entity (the controlling entity) that controls one or more other entities (controlled entities) to present consolidated financial statements;
- defines the principle of control, and establishes control as the basis for consolidation;
- sets out how to apply the principle of control to identify whether an entity controls another entity and therefore must consolidate that entity;
- sets out the accounting requirements for the preparation of consolidated financial statements; and
- defines an investment entity and sets out an exception to consolidating particular controlled entities of an investment entity.

It furthermore covers Definitions, Control, Accounting requirements, Investment entities: Fair value requirement, Transitional provisions and Effective date.

The effective date of the standard is for years beginning on or after 01 April 2020.

The municipality expects to adopt the standard for the first time in the 2020/2021 annual financial statements.

The impact of this standard is currently being assessed.

##### **GRAP 36: Investments in Associates and Joint Ventures**

The objective of this Standard is to prescribe the accounting for investments in associates and joint ventures and to set out the requirements for the application of the equity method when accounting for investments in associates and joint ventures.

It furthermore covers Definitions, Significant influence, Equity method, Application of the equity method, Separate financial statements, Transitional provisions and Effective date.

The effective date of the standard is for years beginning on or after 01 April 2020.

The municipality expects to adopt the standard for the first time in the 2020/2021 annual financial statements.

The impact of this standard is currently being assessed.

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 2. New standards and interpretations (continued)

#### GRAP 37: Joint Arrangements

The objective of this Standard is to establish principles for financial reporting by entities that have an interest in arrangements that are controlled jointly (i.e. joint arrangements).

To meet this objective, the Standard defines joint control and requires an entity that is a party to a joint arrangement to determine the type of joint arrangement in which it is involved by assessing its rights and obligations and to account for those rights and obligations in accordance with that type of joint arrangement.

It furthermore covers Definitions, Joint arrangements, Financial statements and parties to a joint arrangement, Separate financial statements, Transitional provisions and Effective date.

The effective date of the standard is for years beginning on or after 01 April 2020

The municipality expects to adopt the standard for the first time in the 2021/2021 annual financial statements.

The impact of this standard is currently being assessed.

#### GRAP 38: Disclosure of Interests in Other Entities

The objective of this Standard is to require an entity to disclose information that enables users of its financial statements to evaluate:

- the nature of, and risks associated with, its interests in controlled entities, unconsolidated controlled entities, joint arrangements and associates, and structured entities that are not consolidated; and
- the effects of those interests on its financial position, financial performance and cash flows.

It furthermore covers Definitions, Disclosing information about interests in other entities, Significant judgements and assumptions, Investment entity status, Interests in controlled entities, Interests in joint arrangements and associates, Interests in structured entities that are not consolidated, Non-qualitative ownership interests, Controlling interests acquired with the intention of disposal, Transitional provisions and Effective date.

The effective date of the standard is for years beginning on or after 01 April 2020.

The municipality expects to adopt the standard for the first time in the 2020/2021 annual financial statements.

The impact of this standard is currently being assessed.

#### GRAP 110 (as amended 2016): Living and Non-living Resources

The objective of this Standard is to prescribe the:

- recognition, measurement, presentation and disclosure requirements for living resources; and
- disclosure requirements for non-living resources

It furthermore covers Definitions, Recognition, Measurement, Depreciation, Impairment, Compensation for impairment, Transfers, Derecognition, Disclosure, Transitional provisions and Effective date.

The subsequent amendments to the Standard of GRAP on Living and Non-living Resources resulted from editorial changes to the original text and inconsistencies in measurement requirements in GRAP 23 and other asset-related Standards of GRAP in relation to the treatment of transaction costs. Other changes resulted from changes made to IPSAS 17 on Property, Plant and Equipment (IPSAS 17) as a result of the IPSASB's Improvements to IPSASs 2014 issued in January 2015 and Improvements to IPSASs 2015 issued in March 2016.

The most significant changes to the Standard are:

- General improvements: To clarify the treatment of transaction costs and other costs incurred on assets acquired in non-exchange transactions to be in line with the principle in GRAP 23; and To clarify the measurement principle when assets may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 2. New standards and interpretations (continued)

- IPSASB amendments: To clarify the revaluation methodology of the carrying amount and accumulated depreciation when a living resource is revalued; To clarify acceptable methods of depreciating assets; and To define a bearer plant and include bearer plants within the scope of GRAP 17 or GRAP 110, while the produce growing on bearer plants will remain within the scope of GRAP 27

The effective date of the standard is for years beginning on or after 01 April 2020.

The municipality expects to adopt the standard for the first time in the 2020/2021 annual financial statements.

The impact of this standard is currently being assessed.

### **Guideline: Accounting for Arrangements Undertaken i.t.o the National Housing Programme**

The objective of this guideline: Entities in the public sector are frequently involved in the construction of houses as part of government's housing policy, implemented through the national housing programme, which is aimed at developing sustainable human settlements. The Housing Act, Act No. 107 of 1997 provides information about the housing programmes that fall within the scope of the national housing programme. Concerns were raised by preparers about the inconsistent accounting applied to housing arrangements undertaken by entities under the national housing programme. Different accounting may be appropriate where there are differences between the terms and conditions of arrangements concluded by entities. However, under housing arrangements that are undertaken in terms of the national housing programme, there are common features and issues that need to be considered. As a result, the Board agreed to develop high-level guidance for arrangements undertaken in terms of the national housing programme.

It covers: Background to arrangements undertaken in terms of the national housing programme, Transactions that affect the accounting of housing arrangements, Consider whether the municipality undertakes transactions with third parties on behalf of another party, Accounting by municipalities appointed as project manager, Disclosure requirements, Accounting by municipalities appointed as project developer, Accounting for the accreditation fee, commission, administration or transaction fee received, Land and infrastructure, Conclusion and Application of this Guideline to existing arrangements.

The effective date of the guideline is for years beginning on or after 01 April 2019.

The municipality has adopted the guideline for the first time in the 2019/2020 annual financial statements.

The impact of the guideline is set out in note Changes in Accounting Policy.

### **GRAP 18 (as amended 2016): Segment Reporting**

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

The subsequent amendments to the Standard of GRAP on Segment Reporting resulted from editorial and other changes to the original text have been made to ensure consistency with other Standards of GRAP.

The most significant changes to the Standard are:

- General improvements: An appendix with illustrative segment disclosures has been deleted from the Standard as the National Treasury has issued complete examples as part of its implementation guidance.

The effective date of the standard is for years beginning on or after 01 April 2019

The municipality has adopted the standard for the first time in the 2019/2020 annual financial statements.

The impact of the standard is set out in note Changes in Accounting Policy.

## Notes to the Annual Financial Statements

---

### 2. New standards and interpretations (continued)

#### GRAP 20: Related parties

The objective of this standard is to ensure that a reporting entity's annual financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard in:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard of GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual annual financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
  - has control or joint control over the reporting entity;
  - has significant influence over the reporting entity;
  - is a member of the management of the entity or its controlling entity.
- An entity is related to the reporting entity if any of the following conditions apply:
  - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
  - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
  - both entities are joint ventures of the same third party;
  - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
  - the entity is controlled or jointly controlled by a person identified in (a); and
  - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties;
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- Related party transactions; and
- Remuneration of management

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 2. New standards and interpretations (continued)

The effective date of the standard is for years beginning on or after 01 April 2019.

The municipality has adopted the standard for the first time in the 2019/2020 annual financial statements.

The adoption of this standard has not had a material impact on the results of the municipality, but has resulted in more disclosure than would have previously been provided in the annual financial statements.

#### **GRAP 32: Service Concession Arrangements: Grantor**

The objective of this Standard is: to prescribe the accounting for service concession arrangements by the grantor, a public sector entity.

It furthermore covers: Definitions, recognition and measurement of a service concession asset, recognition and measurement of liabilities, other liabilities, contingent liabilities, and contingent assets, other revenues, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is for years beginning on or after 01 April 2019.

The municipality has adopted the standard for the first time in the 2019/2020 annual financial statements.

The impact of the standard is not material.

#### **GRAP 108: Statutory Receivables**

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is for years beginning on or after 01 April 2019.

The municipality has adopted the standard for the first time in the 2019/2020 annual financial statements.

The impact of the standard is not material.

#### **GRAP 109: Accounting by Principals and Agents**

The objective of this Standard is to outline principles to be used by an entity to assess whether it is party to a principal-agent arrangement, and whether it is a principal or an agent in undertaking transactions in terms of such an arrangement. The Standard does not introduce new recognition or measurement requirements for revenue, expenses, assets and/or liabilities that result from principal-agent arrangements. The Standard does however provide guidance on whether revenue, expenses, assets and/or liabilities should be recognised by an agent or a principal, as well as prescribe what information should be disclosed when an entity is a principal or an agent.

It furthermore covers Definitions, Identifying whether an entity is a principal or agent and Accounting by a principal or agent, Presentation, Disclosure, Transitional provisions and Effective date.

The effective date of the standard is for years beginning on or after 01 April 2019.

The municipality has adopted the standard for the first time in the 2019/2020 annual financial statements.

The impact of the standard is not material.

#### **IGRAP 17: Service Concession Arrangements where a Grantor Controls a Significant Residual Interest in an Asset**

# Ngwathe Local Municipality

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 2. New standards and interpretations (continued)

This Interpretation of the Standards of GRAP provides guidance to the grantor where it has entered into a service concession arrangement, but only controls, through ownership, beneficial entitlement or otherwise, a significant residual interest in a service concession asset at the end of the arrangement, where the arrangement does not constitute a lease. This Interpretation of the Standards of GRAP shall not be applied by analogy to other types of transactions or arrangements.

A service concession arrangement is a contractual arrangement between a grantor and an operator in which the operator uses the service concession asset to provide a mandated function on behalf of the grantor for a specified period of time. The operator is compensated for its services over the period of the service concession arrangement, either through payments, or through receiving a right to earn revenue from third party users of the service concession asset, or the operator is given access to another revenue-generating asset of the grantor for its use.

Before the grantor can recognise a service concession asset in accordance with the Standard of GRAP on Service Concession Arrangements: Grantor, both the criteria as noted in paragraph .01 of this Interpretation of the Standards of GRAP need to be met. In some service concession arrangements, the grantor only controls the residual interest in the service concession asset at the end of the arrangement, and can therefore not recognise the service concession asset in terms of the Standard of GRAP on Service Concession Arrangements: Grantor.

A consensus is reached, in this Interpretation of the Standards of GRAP, on the recognition of the performance obligation and the right to receive a significant interest in a service concession asset.

The effective date of the standard is for years beginning on or after 01 April 2019.

The municipality has adopted the standard for the first time in the 2019/2020 annual financial statements.

The impact of the interpretation is not material.

#### **IGRAP 18: Interpretation of the Standard of GRAP on Recognition and Derecognition of Land**

This Interpretation of the Standards of GRAP applies to the initial recognition and derecognition of land in an entity's financial statements. It also considers joint control of land by more than one entity.

When an entity concludes that it controls the land after applying the principles in this Interpretation of the Standards of GRAP, it applies the applicable Standard of GRAP, i.e. the Standard of GRAP on Inventories, Investment Property (GRAP 16), Property, Plant and Equipment (GRAP 17) or Heritage Assets. As this Interpretation of the Standards of GRAP does not apply to the classification, initial and subsequent measurement, presentation and disclosure requirements of land, the entity applies the applicable Standard of GRAP to account for the land once control of the land has been determined. An entity also applies the applicable Standards of GRAP to the derecognition of land when it concludes that it does not control the land after applying the principles in this Interpretation of the Standards of GRAP.

In accordance with the principles in the Standards of GRAP, buildings and other structures on the land are accounted for separately. These assets are accounted for separately as the future economic benefits or service potential embodied in the land differs from those included in buildings and other structures. The recognition and derecognition of buildings and other structures are not addressed in this Interpretation of the Standards of GRAP.

The effective date of the interpretation is for years beginning on or after 01 April 2019.

The municipality has adopted the interpretation for the first time in the 2019/2020 annual financial statements.

The impact of the interpretation is not material.

#### **IGRAP 19: Liabilities to Pay Levies**

This Interpretation of the Standards of GRAP provides guidance on the accounting for levies in the financial statements of the entity that is paying the levy. It clarifies when entities need to recognise a liability to pay a levy that is accounted for in accordance with GRAP 19.

# Ngwathe Local Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 2. New standards and interpretations (continued)

To clarify the accounting for a liability to pay a levy, this Interpretation of the Standards of GRAP addresses the following issues:

- What is the obligating event that gives rise to the recognition of a liability to pay a levy?
- Does economic compulsion to continue to operate in a future period create a constructive obligation to pay a levy that will be triggered by operating in that future period?
- Does the going concern assumption imply that an entity has a present obligation to pay a levy that will be triggered by operating in a future period?
- Does the recognition of a liability to pay a levy arise at a point in time or does it, in some circumstances, arise progressively over time?
- What is the obligating event that gives rise to the recognition of a liability to pay a levy that is triggered if a minimum threshold is reached?

Consensus reached in this interpretation:

- The obligating event that gives rise to a liability to pay a levy is the activity that triggers the payment of the levy, as identified by the legislation;
- An entity does not have a constructive obligation to pay a levy that will be triggered by operating in a future period as a result of the entity being economically compelled to continue to operate in that future period;
- The preparation of financial statements under the going concern assumption does not imply that an entity has a present obligation to pay a levy that will be triggered by operating in a future period;
- The liability to pay a levy is recognised progressively if the obligating event occurs over a period of time;
- If an obligation to pay a levy is triggered when a minimum threshold is reached, the accounting for the liability that arises from that obligation shall be consistent with the principles established in this Interpretation of the Standards of GRAP; and
- An entity shall recognise an asset, in accordance with the relevant Standard of GRAP, if it has prepaid a levy but does not yet have a present obligation to pay that levy.

The effective date of the interpretation is for years beginning on or after 01 April 2019.

The municipality has adopted the interpretation for the first time in the 2019/2020 annual financial statements

The impact of the interpretation is not material.

## Notes to the Annual Financial Statements

	2020	2019
	R	R

### 12. Receivable from exchange transactions disclosure (continued)

The credit quality of receivables from exchange transactions that are neither past nor due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates.

#### Renegotiated terms:

None of the receivables from exchange transactions that are fully performing have been renegotiated in the last year.

#### Fair value of receivables from exchange transactions:

The carrying value of the receivables from exchange transactions recorded at amortised cost approximate their fair values.

#### Receivables from non-exchange transactions past due but not impaired

Receivables from exchange transactions which are less than 3 months past due are not considered to be impaired. At 30 June 2020, R 38,116,980.01 (2019: R48,704,070) were past due but not impaired.

The ageing of amounts past due but not impaired is as follows

1 month past due	1,292,724	1,528,962
2 month past due	2,755,504	12,965,540
3 month past due	34,068,752	34,209,568
	<b>38,116,980</b>	<b>48,704,070</b>

#### Receivables from exchange transactions past due but not impaired

As of 30 June 2020, receivables from exchange transactions of R 567,422,166 (2019: R 482,993,906) were impaired and provided for.

The following factors were considered in determining the impairment:

- Aging of the outstanding debt.
- Whether or not any payment was received during the year.
- Whether the account is active or inactive.
- Whether the account is that of an owner or a tenant.

### 13. Payables from exchange transactions

### Environmental rehabilitation provision

The purpose of this provision is to determine the closure costs for the waste disposal sites in the Ngwathe Municipal area. The sites under consideration are the Edenville, Heilbron, Koppies, Parys and Vredefort disposal sites.

South African solid waste legislation has been going through a thorough metamorphosis during the past few years and continues to do so, affecting all aspects of solid waste management through this process. Almost all aspects of the waste life cycle have been addressed and, more to the point of this report, the issue of landfill designs. New base liner designs for different landfill classes have been detailed, however, no new landfill capping designs for rehabilitation have been detailed since the Minimum Requirements (2nd Edition, 1998) issued by the Department of Water Affairs and Forestry (DWAF) at the time. There were however recent suggestions by the Department of Water and Sanitation (DWS) in a Record of Decision issued to D:EA for the licence applications for the closure of 192 landfill facilities under the National Outcome 10 Project.

However, the Minimum Requirements was used in the past as guideline for the design of the capping layers as well as the capacity of the storm water drainage system and to subsequently calculate rehabilitation cost estimates, which was industry standard. The closure and rehabilitation of a landfill involves firstly the application for a closure licence during which a Basic Assessment and specialist studies are conducted specific to the landfill in question. From this application, it becomes clear as to the specific requirements to properly rehabilitate the landfill and render it environmentally suitable to its proposed end use. If a landfill was issued with an operating permit/licence, a closure design would have been proposed before the issuing of the permit, only now requiring modification (if necessary) rather than a new design.

However, with most landfills being unlicensed/unpermitted, no designs have been done or approved. Historically, a rehabilitation engineering design which included the proposed capping layers was then presented to DWA (now DWS) for approval. After obtaining approval, the landfill was rehabilitated according to the approved design. No closure licences which stipulate capping designs have been issued to date for the Ngwathe Municipality. The closure cost estimates of this provision have therefore been based on the proposed requirements for capping layers by DWS which are similar to stipulated requirements in recently issued closure licences in other Municipalities.

Disposal site 2020	Opening balance	changes in the net discount rate	Movement	Closing balance
Edenville	19,647,579	-	5,428,825	25,076,404
Heilbron	70,937,212	-	3,239,588	74,176,800

(Registration number FS203)

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

	2020	2019
	R	R

### 17. Employee benefit obligations (continued)

#### Post-retirement medical aid plant

The municipality has a post-employment medical aid fund for its pensioners. The post-retirement medical aid are in accordance with Resolutions 8 of the South African Local Government Bargaining Council (SALGBC), signed on 17 January 2003, which state that an employee who retires from employment with an employer and who immediately prior to his or her retirement, enjoys the benefits of subsidy of his or her medical aid contributions by his or her employer, will continue to receive a subsidy calculated as follows.

- If the employee is 55 years or older on 1 July 2003, his or her subsidy from the employer as at the date of retirement will be 60% to a maximum amount of the norms of the cost of his or her medical aid scheme contributions as at the date immediately prior to the date of his or her retirement.

- If the employee is 50 years or older on 1 July 2003, his or her subsidy will be 50% to a maximum amount of the norms of the cost of his or her medical aid scheme contributions as at the day immediately prior to the date of his or her retirement

The municipality makes monthly contributions for the healthcare arrangements to the following medical aid schemes:

- Bonitas
- Hosmed
- Discovery
- Key Health
- LA Health
- Samwumed.

#### Long Service benefits.

The municipality's liability for long service benefits relating to vested leave benefits to which employees may become entitled upon completion of five years of service and every five years thereafter. These leave benefits are in accordance with paragraph 11 of South African Government Bargaining Council (SALGBC) collective agreement on conditions of service for the Free State division of SALGA which was signed on July 2010.

In accordance with South African Local Government Bargaining Council (SALGBC) issued circular 1 of 2011 (issued 27 June 2011 with an effective date of 1 March 2011), specific bonuses are payable to employees for long service. Bonus are payable in the following scale:

Years of service completed	Percentage of annual salary as a bonus	Additional Leave days
> 5 Years	2%	5 days
> 10 Years	3%	10 days
> 15 Years	4%	15 days
> 20 Years	5%	15 days
> 24 - 45 Years	6%	15 days

#### Key assumptions used

Assumptions used at the reporting date:

CPI (Medical aid)	4.25 %	6.48 %
CPI (Long service awards)	3.49 %	4.87 %
Discount rate (medical aid)	9.40 %	10.68 %
Discount rate (Long service award)	8.02 %	8.10 %
Medical aid inflation (Medical aid)	5.78 %	8.48 %
Salary increase rate (Long service awards)	4.49 %	5.87 %
Net discount rate (Medical aid)	3.45 %	2.03 %
Net discount rate (Long service awards)	3.38 %	2.11 %
Continuation percentage	100.00 %	100.00 %

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

	2020 R	2019 R
--	-----------	-----------

### 17. Employee benefit obligations (continued)

#### Other assumptions

Assumed healthcare cost trends rates have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed healthcare cost trends rates would have the following effects:

	One percentage point increase	One percentage point decrease
Employer's accrued liability (Long service awards)	15,512,777	13,870,772
Current service cost (Long service awards)	1,228,483	1,092,136
Interest cost (Long service awards)	1,173,882	1,042,193
Employer's accrued liability (Medical aid)	20,827,968	17,741,799
Current service cost (Medical aid)	1,889,246	1,590,387
Interest cost (Medical aid)	36,195	27,565

Amounts for the current and previous four years are as follows:

	2020 R	2019 R	2018 R	2017 R	2016 R
Defined benefit obligation	33,891,040	36,251,855	32,363,755	55,365,000	54,325,000

#### Defined contribution plan

The municipality makes provision for post-retirement benefits to all employees and councillors, who belong to different retirement contribution plans which are administered by various pension funds, provident and annuity funds.

These plans are subject to the Pension Fund Act, 1995 (Act No. 24 of 1956) and include defined contribution plans

The municipality is under no obligation to cover any unfunded benefits. The only obligation of the municipality is to make the specific contributions.

The following are the multi-employer funds and are defined contribution plans:

- South African Local Authorities Pension Fund (SALA)
- Free State Municipal Pension Fund (FSMPF)
- Municipal Councillors Pension Fund (MCPF)

Sufficient information was not available to use defined benefit accounting for the fund and it was accounted for as defined contribution plan due to the following reasons:

- The assets of each fund are held in one portfolio and are not notionally allocated to each of the participating employers;
- One set of financial statements is compiled for all the funds are not for each participating employer; and
- The same rate of contribution applies to all participating employers and no regard is paid to differences in membership distribution of the participating employers.

This is in line with the exemption in GRAP 25 paragraph 31 which state that where information is required for proper defined benefit accounting is not available in respect of the multi-employer and state plan; these should be accounted for as defined contribution plans.

The municipality is under no obligation to cover any unfunded benefits.

The amount recognised as an expense for defined contribution plans is	2,360,815	3,888,100

## Notes to the Annual Financial Statements

	2020 R	2019 R
<b>25. Government grants and subsidies (continued)</b>		
Balance unspent at beginning of year	15,162	-
Current-year receipts	6,000,000	3,000,000
Conditions met - transferred to revenue	(5,745,900)	(2,984,838)
Grant withheld - transferred to equitable share	(15,000)	-
	<u>254,262</u>	<u>15,162</u>

Conditions still to be met - remain liabilities (see note 15).

The grant is used to implement the Integrated National Electrification Programme by providing capital subsidies to municipalities to address the electrification backlog of occupied residential dwellings, and the installation of bulk infrastructure.

### Water Service Infrastructure Grant (WSIG)

Balance unspent at beginning of year	7,471,507	10,308,147
Current-year receipts	13,000,000	20,000,000
Conditions met - transferred to revenue	(12,979,999)	(12,579,368)
Grant withheld	(7,400,000)	(10,257,272)
	<u>91,508</u>	<u>7,471,507</u>

Conditions still to be met - remain liabilities (see note 15).

This grant aims to accelerate the delivery of clean water and sanitation facilities to communities that do not have access to basic water services.

### Regional Bulk Infrastructure Grant (RBIG)

Balance unspent at beginning of year	28,793,769	2,398,322
Current-year receipts	38,000,000	33,000,000
Conditions met - transferred to revenue	(25,544,325)	(4,206,231)
Grant withheld	(27,600,000)	(2,398,322)
	<u>13,649,444</u>	<u>28,793,769</u>

Conditions still to be met - remain liabilities (see note 15).

The purpose of the overall regional bulk programme is to develop an oversight function that will ensure the construction of enabling infrastructure and of operations and maintenance of regional bulk infrastructure in the water sector.

### Local Government Finance Management Grant (FMG)

Balance unspent at beginning of year	-	67,947
Current-year receipts	2,680,000	2,215,000
Conditions met - transferred to revenue	(2,680,000)	(2,282,947)
	<u>-</u>	<u>-</u>

The grant is used to promote and support reforms in financial management by building capacity in municipalities to implement the Municipal Finance Management Act.

### Expanded Public Works Programme (EPWP)

Current-year receipts	1,377,000	-
Conditions met - transferred to revenue	(1,377,000)	-

### 44. Risk management

#### Financial risk management

The municipality's activities expose it to a variety of financial risks: market risk (cash flow interest rate risk), credit risk and liquidity risk.

#### Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

At 30 June 2020	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years

## Notes to the Annual Financial Statements

Figures in Rand

### 44. Risk management (continued)

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents and trade receivables. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an on-going basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards. Credit guarantee insurance is purchased when deemed appropriate.

Financial assets exposed to credit risk at year end were as follows:

Financial instrument	2020	2019
Other financial assets	954,874	1,056,728

#### Market risk

#### Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

### 45. Going concern

We draw attention to the fact that at 30 June 2020, the municipality had an accumulated surplus (deficit) of R (147,238,468) and that the municipality's total liabilities exceed its assets by R (147,238,468).

The financial statements indicates that the municipality incurred a net loss of R152 458 071 during the year ended 30 June 2020. As of that date, the municipality was in a net current liability position of R1,423 291 534 means that current liabilities exceed current assets and indicates that the municipality may struggle to meet their current obligations as they become due and payable.

This is further evidenced in the creditor's payment period which increased to 156 days from 126.6 days in the previous financial year. In addition, the municipality owed Eskom R1234 165 648(2019: R1085 074 589) and the Department of Water Affairs R124 386 948(2019: R108 592 158) as at 30 June 2020 which is long overdue. These events or conditions, along with other matters indicate that a material uncertainty exists that may cast significant doubt on the municipality's ability to continue as a going concern.

### 46. Events after the reporting date

Management is not aware of any events that happened after the reporting date that requires disclosure.

### 47. Unauthorised expenditure

## Notes to the Annual Financial Statements

Figures in Rand

### 51. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

The reasons for these deviations were documented and reported to the accounting officer who considered them and subsequently approved the deviation from the normal supply chain management regulations. The expenses incurred as listed hereunder have been approved:

30 June 2020	Sole suppliers 434,560	Emergency 24,493,075	Impractical -	Strip and quote 488,968
30 June 2019	Sole suppliers 184,323	Emergency 39,029,648	Impractical -	Strip and quote 631,121

### 52. Accumulated surplus

### 53. Budget differences

#### Material differences between budget and actual amounts

Management considers any variances above 10% to be significant

53.1 -Municipality collected less than what was budgeted for, this might be due to changes in the systems that started in the 2020 financial year.

53.2 - The municipality collected 50% less on the rental of facilities in the 2020 financial year, municipality is unable to collect rent on some of municipal properties due to unemployment

53.3 - More was collected on the 2020 financial year investments that were made with financial institutions, furthermore the municipality billed more interest on outstanding debtors due to non-collection of debtors in the prior and current financial year.

53.4 - Management anticipated to collect 80% more on other income without taking in to account the fact that there are no revenue enhancement strategies in the 2020 financial year.

53.5 - The variance is less than 10%, therefore it is immaterial.

53.6 - The variance is less than 10%, however it is negative growth as the municipality received less of its equitable share in the 2020 financial year.

53.7 - The municipality budgeted more on fines and penalties based on growing number of debtors with illegal connections.

53.8 - Municipality budgeted less on depreciation with the intention of keeping the budget under control.

53.9 - Management budgeted 70% less, without taking in to account the fact that there is no credit control and collection strategies in place or arrangements for long outstanding receivables as at 30 June 2020, and that the community has high number of indigents applicants

53.10 - Management budgeted less on finance cost without taking in to account the payables book value of R1 billion inclusive of Eskom and DWA.

53.11 -Management managed to spend less than what was budgeted with the goal of cost saving and spending according to the repairs and maintenance plan.

### 53. Budget differences (continued)

53.14 - This line item was budgeted under general expenses, however the increase was in line with annual accounting fees increases.

53.15 - Management did not budgeted for this line item. (Impairments)

53.16 -Management budgeted less with the intention of spending less on its day to day operations of the municipality.

53.17 - Municipality does not budget for this line items. (Fair Value adjustment)

53.18 - Municipality does not budget for this line items. (Actuarial gains)

53.19 - Municipality does not budget for this line items. (Inventory surplus)

53.20 -Management budgeted significantly less for inventories with the intention of using all the available materials where possible.

53.21 -The municipality budgeted for both types of receivables on one line item "receivables from non-exchange", the variance is 10% which is immaterial for both exchange and non-exchange.

53.22 - Municipality did not budget for this line items. (VAT receivable).

53.23 - Municipality did not budget for this line items. (Other receivables).

53.24 - Municipality budgeted less with the intention of having to spend on all the approved projects at the end of the financial year.

53.25 - Budgeted less as they did not take in to account the new valuation roll that became effective July 2019 showing new and improved market values.

53.26 - The municipality budgeted less as they were not expecting to have additional assets completed in the 2020 financial year.

53.27 - The municipality budgeted more on this line item with the intention of acquiring more.

53.28 - Municipality did not budget for this line items. (Other financial assets).

53.29 - The municipality budgeted less with the intention of meeting its obligations when they are due, Eskom and DWA are the most material creditors in value.

53.30 - Municipality did not budget for this line items. (Consumer deposits)

53.31 -Municipality did not budget for this line items. (Employee benefit obligation)

53.32 -Municipality did not budget for this line items. (Unspent conditional grant)

53.33 -The Municipality has budgeted more on landfill site. The intention is to reach a desirable compliance status in the next few financial years.

53.34 -The municipality budgeted for long term financial liabilities however there is no actual financial liabilities in current financial year.

53.35 - The Municipality expected to receive more cash on the receivables and other revenue producing assets.

53.36 - Only the actual cash portion was taken in to account, hence the 100 Variance.

53.37 - The Municipality's cash producing assets and other revenue streams were expected to bring in more revenue.

53.38 - Employee cost were budgeted under suppliers and employee cost, employee cost and suppliers payments were

### **53. Budget differences (continued)**

budgeted as one line item, management has managed to stay well below the Budget by 35%.

53.39 - Management budgeted for actual payment of financial liability of which no obligation exit.

53.40 - Municipality budgeted to pay cash on finance charges however the actual expenditure was included in cash generated from operations note.

53.41 - Only assets that were already paid for by cash were taken in to account for cash flow purposes, hence the variance is high.

53.42 - Only the cash component of the employee benefits obligation was taken in to account, this item was not budgeted by the municipality.

53.43 - Municipality did not expect to receive the donations made by the Free State Government garage.

53.44 - The actual expenditure for this line item was included under repairs and maintenance.
